Actual data from home health agencies (rounded) in alphabetical order. All home health agencies may not be listed. Look at "Home Health Compare" at <a href="http://www.medicare.gov">www.medicare.gov</a> on the web for a complete list of Medicare-certified home health agencies in your area.				

The Centers for Medicare & Medicaid Services (CMS), an agency of the U.S. Department of Health and Human Services, believes that one way to improve the quality of care is to provide quality measures you can use to compare home health agencies.

**What is home health care?**

Home health care is provided when you have a medical need for skilled nursing care and other services, like physical and occupational therapy, speech-language therapy, and medical social services provided by a variety of skilled health care professionals at home. Home health care may help you reach and keep your best physical, mental, and social well-being.

**Why is this information important?**

Quality measures along with other information can help you make decisions about home health care. CMS selected only a few measures of outcomes of care to

represent the care given by each agency. We chose each of these quality measures because they relate to activities that are important to help you live independently at home.

**More information?**

CMS has more quality measures and other information to help you make decisions about home health care. Look at "Home Health Compare" at [www.medicare.gov](http://www.medicare.gov) on the web, or call 1-800-MEDICARE (1-800-633-4227). TTY users should call 1-877-486-2048. You may also talk to your doctor or ask friends about their home health experiences.

CMS and MetaStar, Inc. (Wisconsin's Quality Improvement Organization) are committed to work together with consumers, those who act on their behalf, the home health industry, and the State of Wisconsin to improve the quality of care for home health care patients.
