Complete Remote Identity Proofing

Step #1: Identity Verification Overview

To protect your privacy, you will need to complete Identity Verification successfully, before requesting access to the selected role. Below are a few items to keep in mind.

1. Ensure that you have entered your legal name, current home address, phone number, date of birth and email address correctly. We will only collect personal information to verify your identity with Experian, an external Identity Verification provider.

2. Identity Verification involves Experian using information from your credit report to help confirm your identity. As a result, you may see an entry called a “soft inquiry” on your Experian credit report. Soft inquiries do not affect your credit score and you do not incur any charges related to them.

3. You may need to have access to your personal and credit report information, as the Experian application will pose questions to you, based on data in their files. For additional information, please see the Experian Consumer Assistance website - [http://www.experian.com/help/](http://www.experian.com/help/)

If you elect to proceed now, you will be prompted with a Terms and Conditions statement that explains how your Personal Identifiable Information (PII) is used to confirm your identity. To continue this process, select ‘Next’.
